the possibilities.

REAL PEOPLE. REAL RESULTS.

THE VIVAMEDICAL EXPERIENCE.

Dr. Lyn Pascoe and her knowledgeable staff take pride in providing the very best in effective skin care treatments in a hygienic medical setting that is professional and inviting. Their focus is on exceptional customer service and outstanding results. Dr. Pascoe feels it is important to educate her patients in a relaxed and honest way so that an informed decision is made when choosing the aesthetic treatment or product that is right for them.

Dr. Pascoe has been practicing as a Full Service Family Physician since 1985. In 2003, she added Medical Aesthetics practice. Bringing over 20 years of medical experience to her consultations, she will customize a safe and effective treatment and skin care program that meets your needs, lifestyle and budget.

COME CLOSER

NOW COME

If you feel self-conscious in getting close because of the quality of your complexion, maybe it's time to examine what a difference **vivamedical** can make to your skin.

Begin the process to beautiful skin.

A complimentary consultation is the first step and always includes a thorough assessment of your skin using advanced testing, discussion on non-surgical innovations and a customized treatment plan, all tailored specifically to your concerns. At vivamedical aesthetics, we offer leading aesthetic treatments to men and women that are reliable, effective and safe.

Concerns. Meet Solutions.

Radiate vitality

More beautiful skin can be yours! Skin that looks even, supple, luminous and firm is universally desired and now achievable. Advanced laser systems, chemical peels, medical microdermabrasion (Silkpeel), soft tissue fillers and natural purified proteins (Botox), photofacial rejuvenation are just some of the options that can provide that refreshed and radiant appearance that everyone would like to possess.

See a real difference to your skin

Lines, wrinkles, acne scars, enlarged pores, sun spots and lack luster skin can all be successfully treated using one or a multi-prong approach. Dr. Lyn Pascoe is personally committed to excellence and delivering the best results possible, offering advanced and effective skin care treatments. Discover how our professional medical aesthetic clinic can truly provide real and lasting results!

Bringing you the latest in scientific skin therapy.

Lines and wrinkles making you frown?

Many options are available which can include Botox, soft tissue fillers, fractional laser resurfacing, chemical peels and/or medical microdermabrasion.

Go from redness to clear, toned skin

Rosacea, broken capillaries and facial flushing can benefit greatly with intense pulsed light, medical microdermabrasion and skin care products. Photo rejuvenation targets the pigment and vessels with pulses of light resulting in a more even skin texture.

Renew your arms and legs

Pigmentation disorders, which can include sun damage on arms and hands, are treated through a customized program of intense pulsed light, fractional resurfacing and chemical peels.

Do spider veins and varicose veins on your legs limit what you will wear? There are now proven technologies to reduce and eliminate them.

SOS! Special Occasion?

Whether it is making a great first impression, a grand entrance or simply wanting to look your very best, Dr. Pascoe and her staff, can "wake up" dull, tired looking skin. A variety of services tailored to your specific needs will be designed to refine, sculpt and even add a glow to your complexion. Who doesn't want naturally luminous skin, especially for an important event in your life?

Banish Unwanted Hair

Intense pulsed light is extremely reliable in eliminating unwanted hair. Experience the freedom with our advanced laser technology that is safe, effective and, because our lasers are updated on a regular basis, the results are permanent.

Headache Management

Migraine and chronic tension headaches can be disabling but now you no longer need to suffer. Botox has been used, safely and effectively, in the

management of the symptoms with often a sharp reduction in both the frequency and intensity.

Control Your Acne

Whether adolescent or adult acne, we have treatments to help control it through a variety of methods based on your individual needs. If you also have acne scars, there are pulsed light laser treatments and fillers that can target the scars, reducing and even eliminating them. The result is beautifully smooth, clear skin.

Feel at Ease

Hyperhidrosis or excessive sweating can be uncomfortable and embarrassing. An effective and innovative treatment through a series of Botox injections into the effected area can provide relief with no downtime.

Maintain and Enhance

All skin care product lines at vivamedical are personally selected by Dr. Lyn Pascoe for their performance, either as stand-alone for daily home care or to maintain in-clinic results and are only available through your physician. They contain high concentrations of pharmaceutical grade exfoliants, vitamins and anti-oxidants to help maintain skin's clarity.

Jane Iredale Natural Mineral Cosmetics has been recommended by Plastic Surgeons and Dermatologists throughout the world. The ingredients are a highly sophisticated blend of minerals and pigments that is actually good for the skin, anti-inflammatory, non-comedogenic, water resistant and offers a broad spectrum UVB and UVA protection.

The Whole Picture

In order to truly reap the full benefits, Dr. Pascoe endorses a healthy and balanced lifestyle. Take time for you and begin the process of more vibrant skin.
